What's in an app? (application components)

Activities: An activity is the key execution component . You need at least one activity in an app that deals with the UI.

What's in an app? (application components)

Fragments: Fragments bring more flexibility in handling app functionalities and user interfaces.

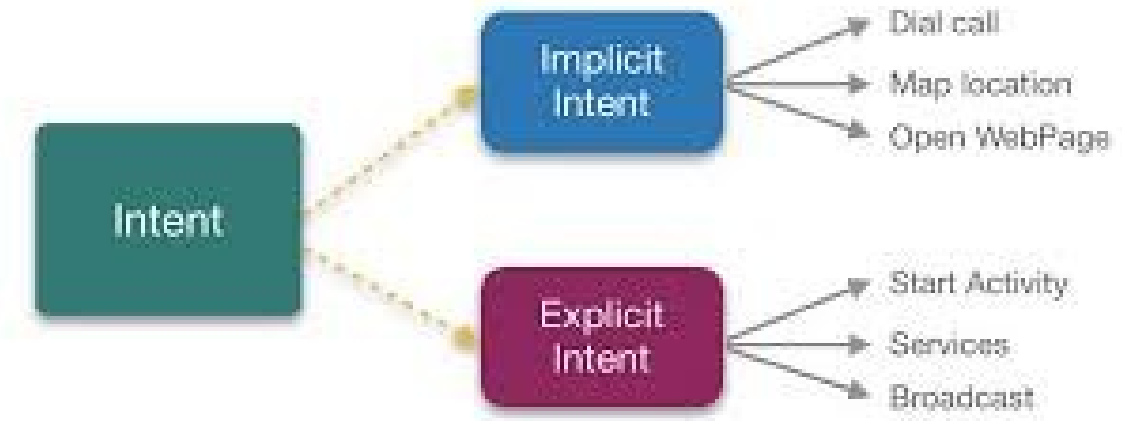

What's in an app? (application components)

Services: Services are long running programs that don't need to interact with the UI . Examples of services could be listening to music, updating the location. An activity will control a service; that is, start it, pause it, bind and get data from it.

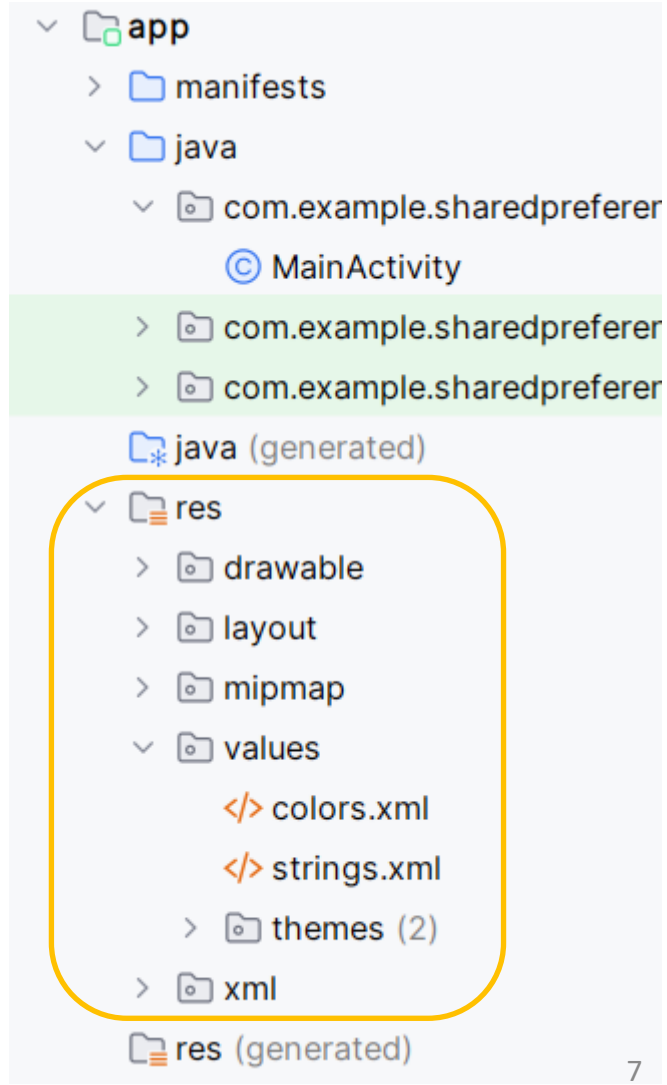

What's in an app? (application components)

Broadcast Receivers: They handle communication between Android OS and applications.
Content Providers: They handle data and database management issues.
Manifest+Res
Intent: Explicit and implicit.

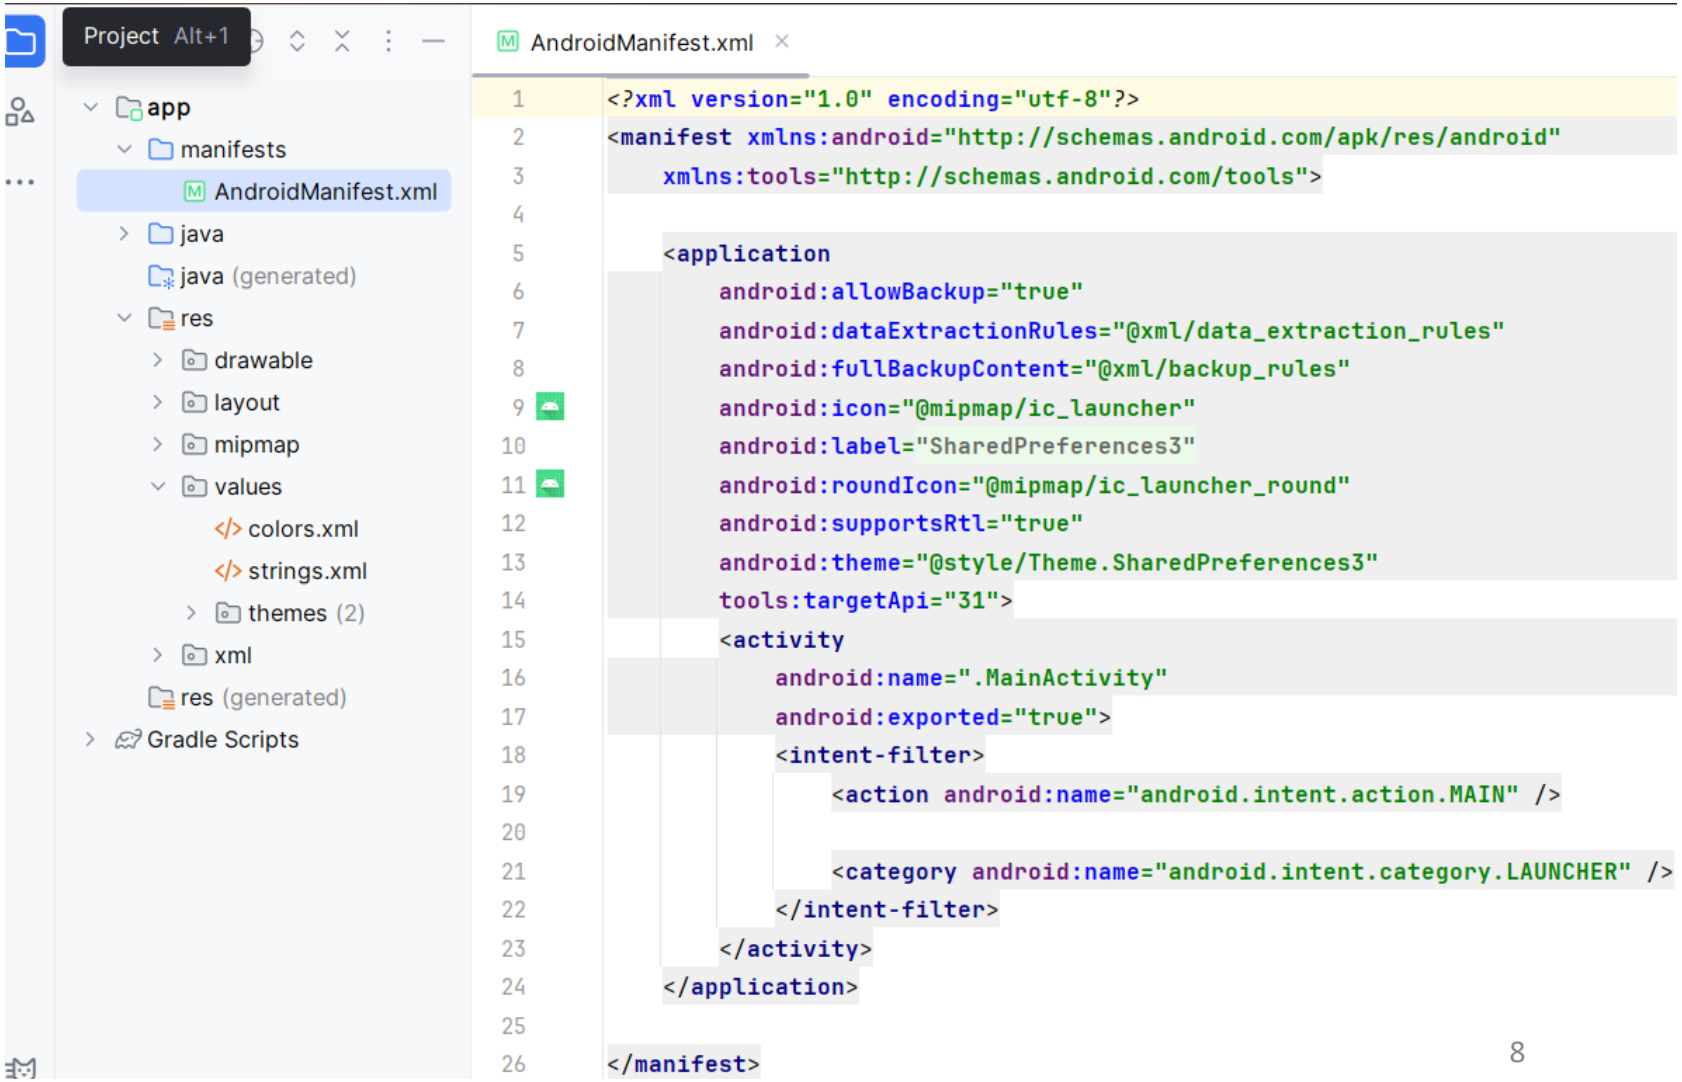

What's in an app? (application components)

Resources: External elements, such as strings, constants and drawable pictures.

What's in an app? (application components)

ViewGroup

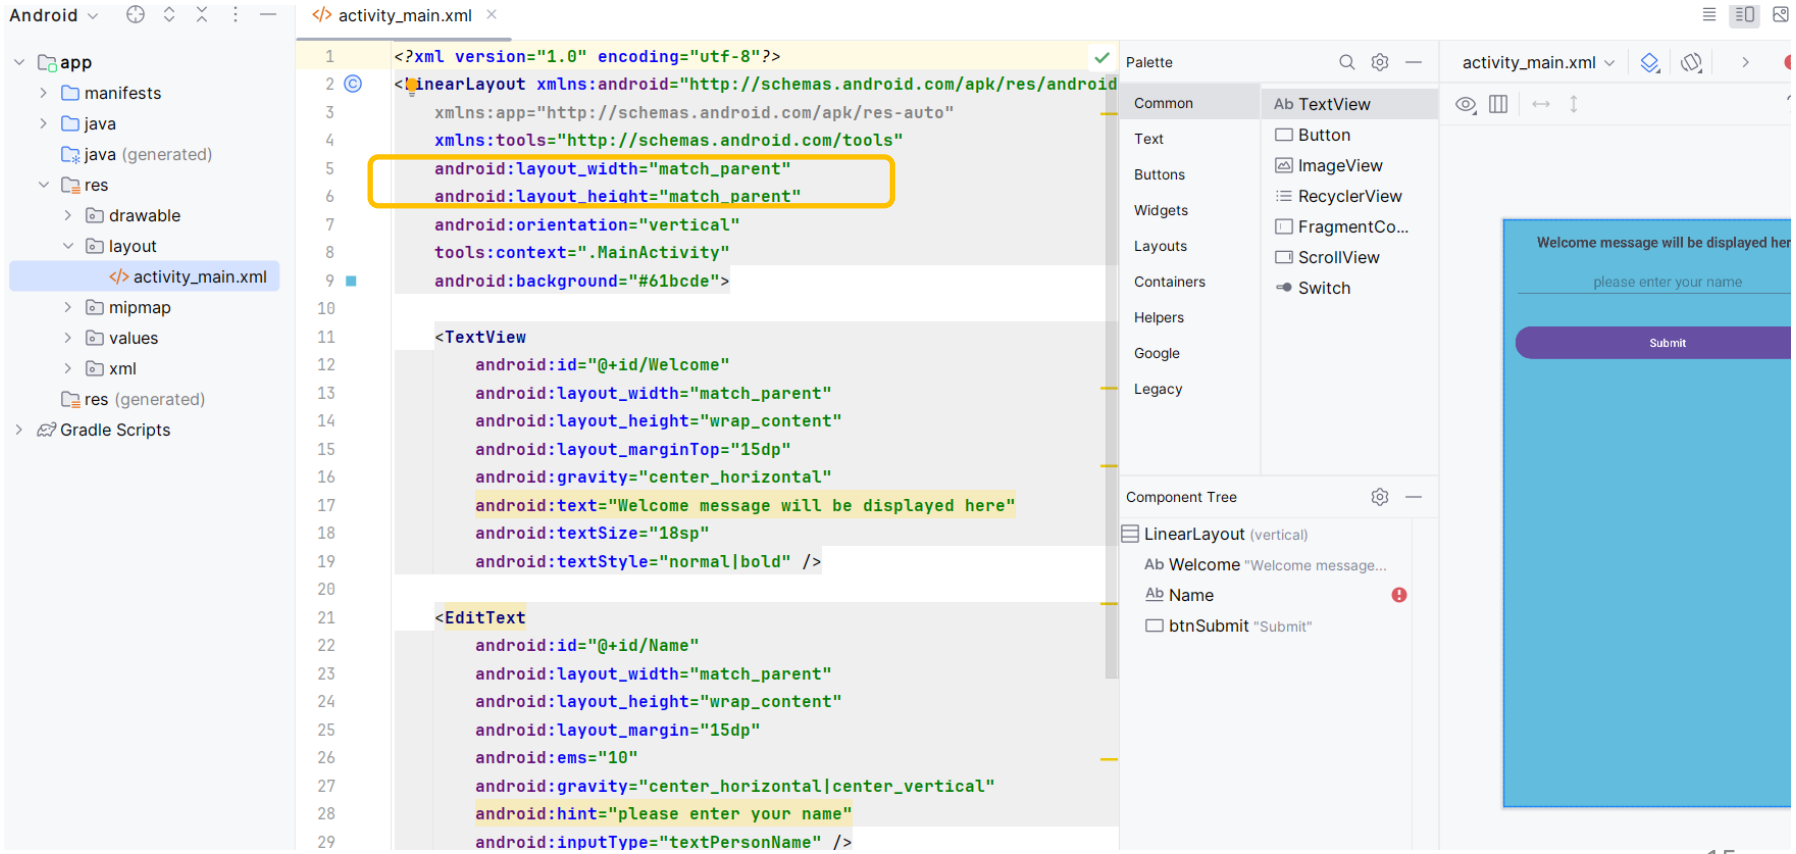

A **View Group** is a subclass of the ViewClass and can be considered as a superclass of Layouts. It provides an invisible container to hold the views or layouts. ViewGroup instances and views work together as a container for Layouts.

- LinearLayout
- RelativeLayout
- FrameLayout
- GridView
- ListView

What's in an app? (application components)

Layout: View hierarchies that control screen format and appearance of the views.

Common layout

RelativeLayout

GridLayout

Activity Lifecycle

با اجرای این متد، اکتیویتی برای اولین بار ساخته می‌شود.

با اجرای این متد، اکتیویتی برای کاربر قابل مشاهده می‌شود.

با اجرای این متد، اکتیویتی آماده تعامل با کاربر است.

کاربر مجدد اکتیویتی را اجرا می‌کند

کاربر به اکتیویتی برمی‌گردد

اکتیویتی دیگری اجرا می‌شود

با اجرای این متد، اکتیویتی به صورت موقت نگه داشته می شود تا اکتیویتی دیگری شروع به کار کند.

برنامه‌های با اولویت بالاتر نیاز به حافظه دارند

اکتیویتی به مدت طولانی مشاهده نشده است

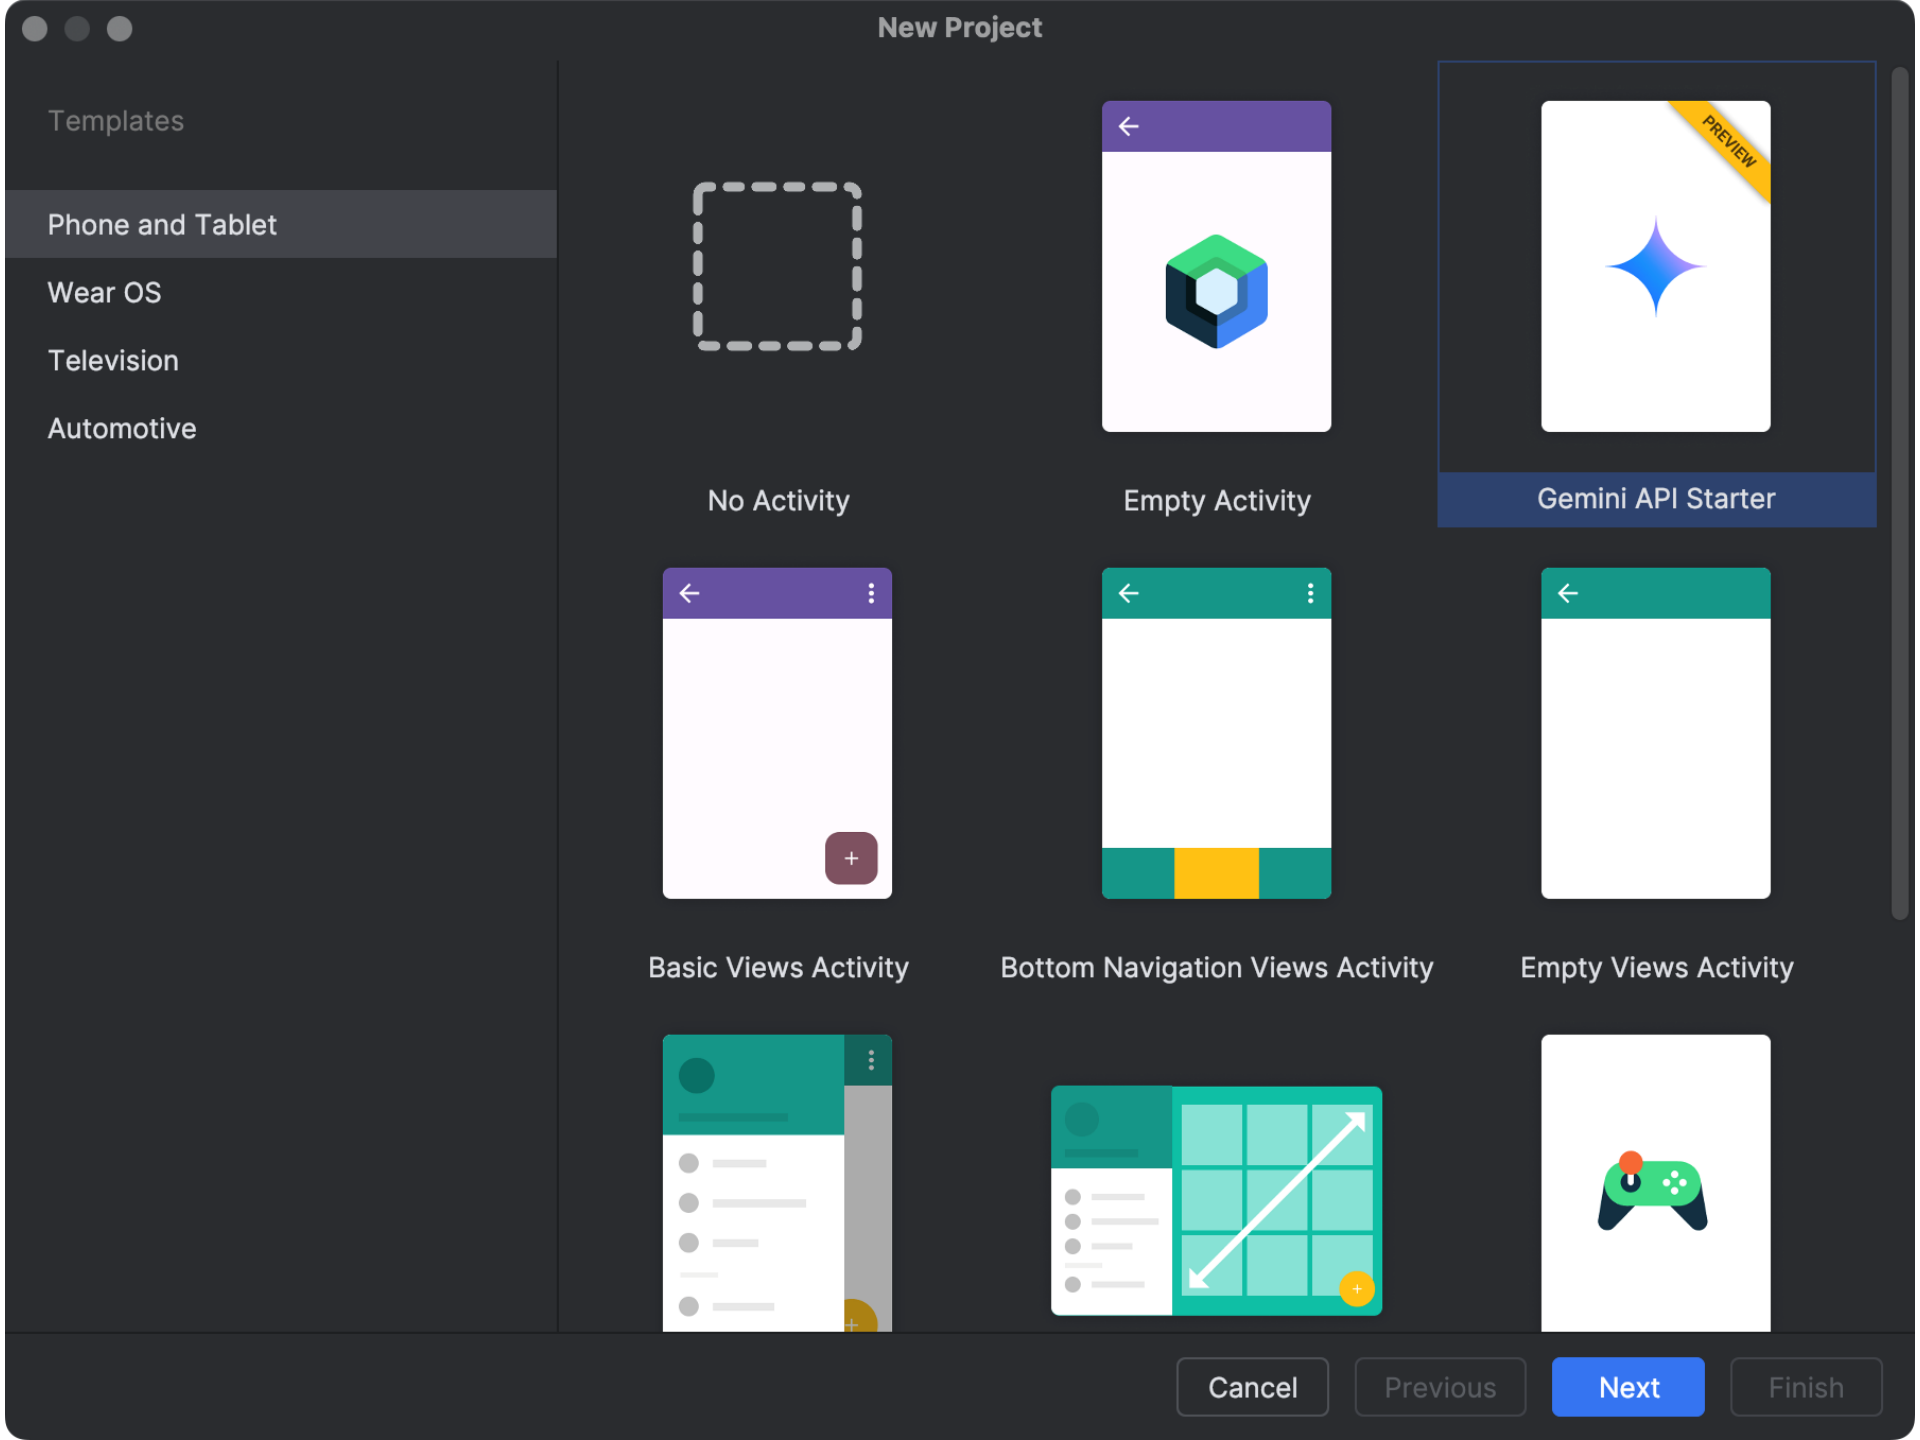

با اجرای این متد، اکتیویتی برای کاربر قابل مشاهده نیست.

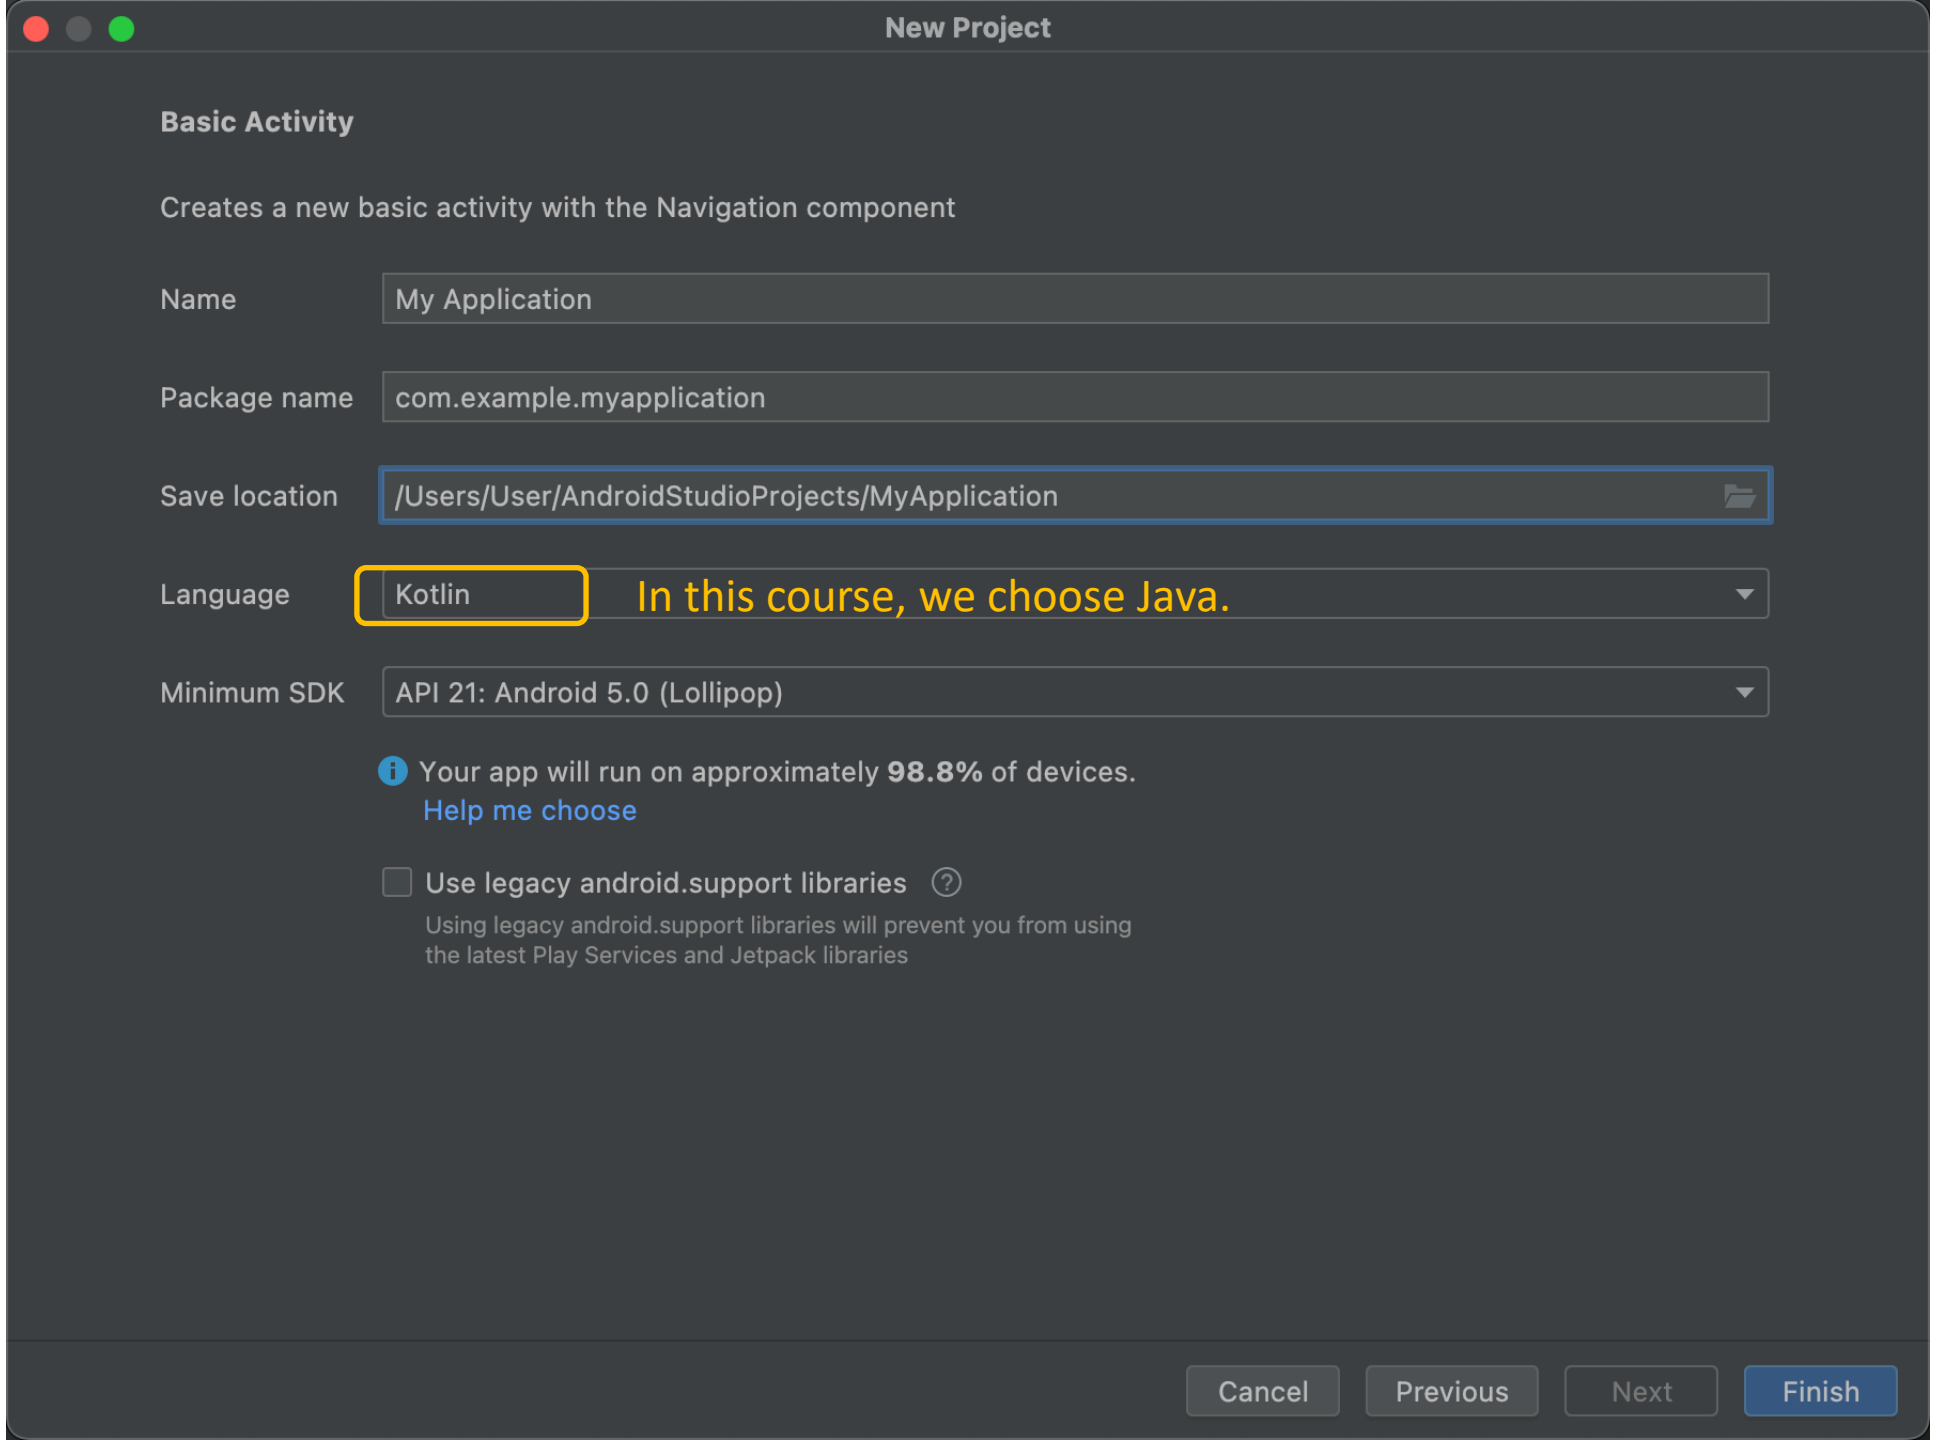

کاربر مجدد اکتیویتی را اجرا می‌کند

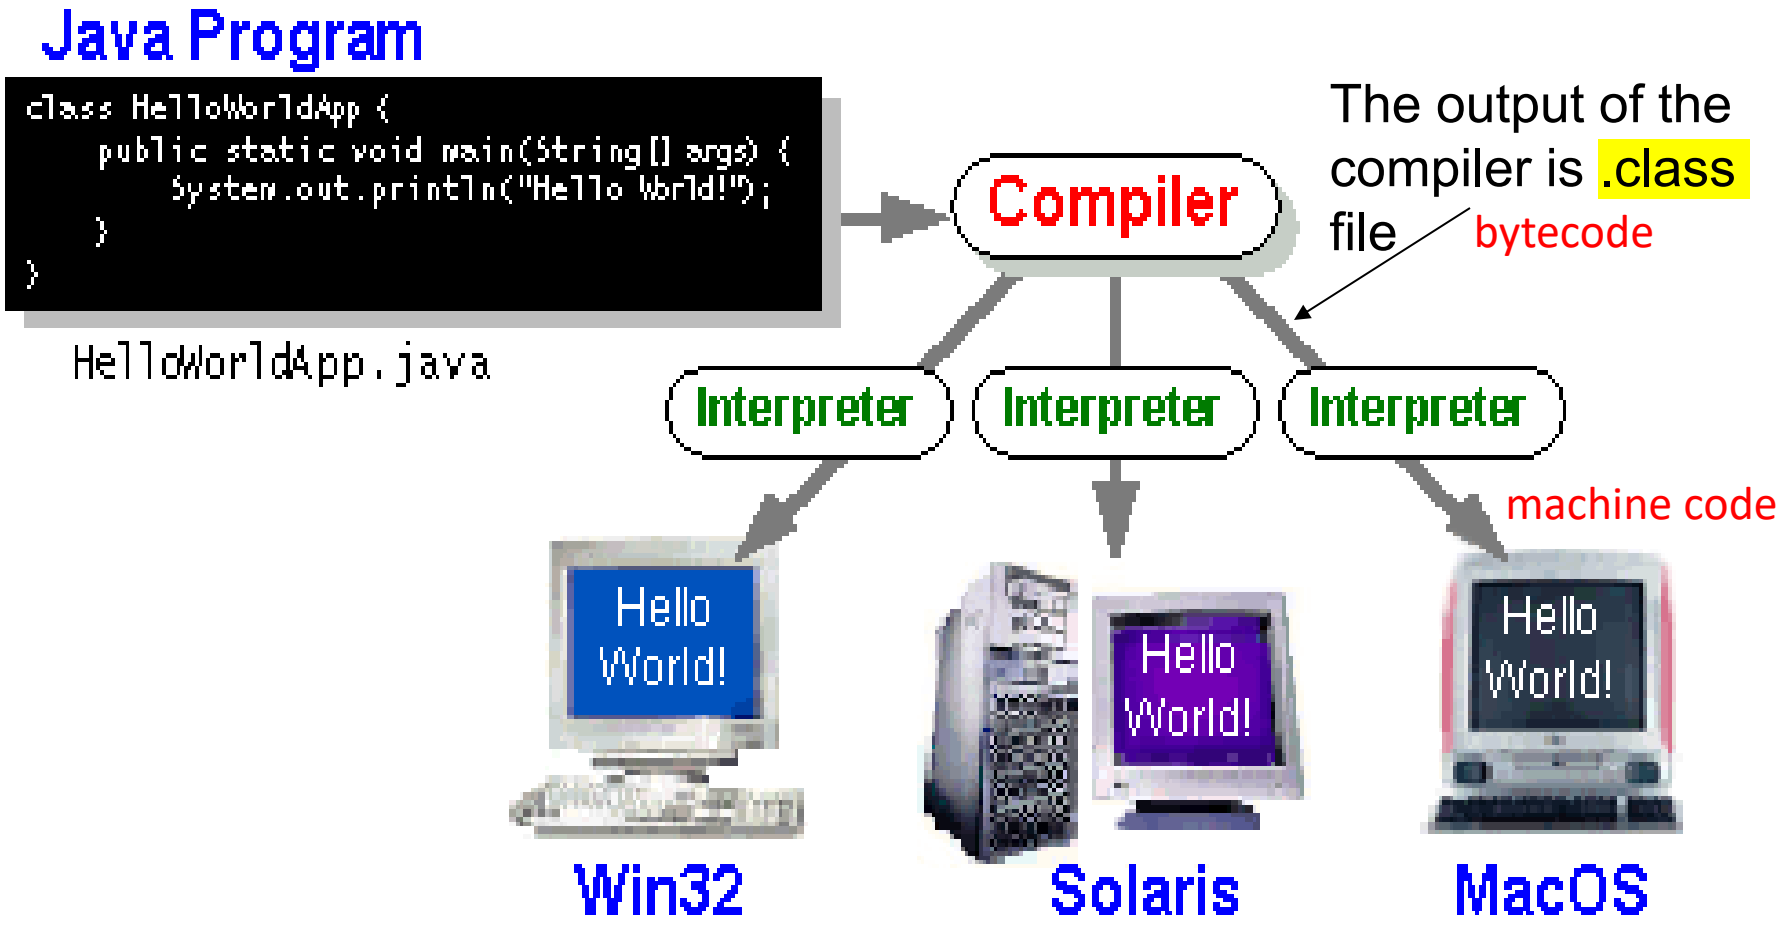

کار اکتیویتی پایان یافته و یا توسط سیستم خاتمه یافته است

با اجرای این متد، اکتیویتی به طور کامل از بین می‌رود.
