

Basic Routing Concepts

Basic Routing

- **IP Routing** is the process of delivering packets from one network to another.
- Routers do not concern about **HOSTS** , the only thing is important to routers , is **NETWORKS**.
- Routing process is based on Layer **3** addresses.

Routing Table

Q. How Does a router learn Paths to other networks ?

A. They know their connected networks.

Other paths should be taught to routers:

- Static
- Dynamic
