Link Aggregation (EtherChannel) Concepts

EtherChannel
Switching

EtherChannel Protocols

- **PAGP**
(Port Aggregation Protocol)

- **LACP (IEEE 802.1AD)**
(Link Aggregation Control Protocol)

EtherChannel
Switching

EtherChannel Protocols

PAGP Vs LACP

- In PAGP aggregation is up to 8 links.
- In LACP aggregation is up to 16 links but only 8 links is active simultaneously.

EtherChannel
Switching

EtherChannel Protocols

	LACP	PAGP
ON	ON	ON
Passive	Passive	Auto
Active	Active	Desirable

	ON	Passive	Active
ON	YES	NO	NO
Passive	NO	NO	YES
Active	NO	YES	YES
